#### INTRODUCTION

#### PROLOGUE: ENTER THE MEME ARENA

Just raw meme velocity deployed with digital precision. If you're here early, you're not just a buyer – you're a Commander.

#### THE NEW WORLD BEGINS

# \$TRUMPSNW™

## TRUMPS NEW WORLD™

### WHITEPAPER

#### MISSION STATEMENT

\$TRUMPSNW™ isn't just another meme coin – it's a movement. A decentralized declaration of digital dominance. Designed to weaponize meme culture and built on Solana for maximum speed and precision, this is crypto for those who command, not comply. No VC chokeholds. No suit-and-tie slowdowns. Just bold tech, viral reach, and full-blown meme warfare. Own the impossible. Command the future.

#### PROJECT PHILOSOPHY

##### The Ethos of \$TRUMPSNW™

\$TRUMPSNW™ is built on one thing: belief.

Belief that memes are weapons. Belief that decentralization doesn't need a white paper written by suits. Belief that if you want to change the world, you start by owning the narrative. This isn't a slow burn. It's a flashpoint. We're not here to fit in – we're here to dominate the conversation, convert the culture, and redefine crypto as a battlefield for attention. This is not a meme coin with a purpose. This is purpose in meme form.

#### Strategic Funding Protocol

#### 💰 Funding Strategy (No Transaction Tax)

\$TRUMPSNW launched with 0% transaction tax – no automatic fees on buys or sells. Instead of on-chain taxation, the project uses a Strategic Developer Wallet containing a portion of the total supply. These tokens may be:

- Slowly added to the LP for liquidity support
- Used for funding development, listings, and growth
- Allocated toward partnerships, platforms, or rewards

This wallet is manually managed by the team to preserve price strength while giving the project full tactical flexibility. There are no fixed schedules, no automatic deductions, and no surprise token drains.

🧠 Future Flexibility: Smart contract tax automation may be introduced later depending on ecosystem evolution. If transaction taxes are introduced later, a separate Strategic Ops Wallet “may be activated to collect and deploy SOL for marketing, growth, and platform utility.

#### 👛 Project Compensation

The project team may, at its discretion, allocate a portion of Meme Arsenal (Phase 1 & 2) funds to support ongoing development, platform operations, and contributor efforts. This includes – but is not limited to – marketing, partnerships, platform tools, and fair compensation for time invested. Funds may also be drawn from other strategic wallets as mission needs arise. No allocations are guaranteed. All uses are determined based on performance, growth strategy, and operational needs. Over time, the team may evolve this compensation model in line with project maturity and ecosystem expansion.
